Articulation Agreement between 
Assumption College and 
Regis College School of Nursing, Science, and Health Professions

This articulation agreement, which is effective on the date of the final signature, provides qualified Assumption College seniors with accelerated admission into Regis College’s Post-Baccalaureate Certificate in Nuclear Medicine Technology.

Qualified students hoping to enter the Nuclear Medicine Technology field after Assumption College can apply for the Regis College Post-Baccalaureate NMT program, which would offer them 1) a waived application fee and 2) preferred admission without the competition of the rest of the applicant pool. Students will apply during the fall or spring senior year at Assumption College. All majors are eligible to apply though preference will be given to science majors.

The following requirements must be met by applicants:

• Anticipated successful completion of BA or BS degree from Assumption College in May of their senior year
• Completion of the 9 prerequisite undergraduate courses (only 5 need to be completed at time of application):
  * Chemistry I and II with lab (CHE 131, 131L, 132 and 132L)
  * Mammalian Anatomy (Bio 240 and 240L) and Physiology (Bio 370 and 370L)
  * Microbiology (Bio250 and 250L)
  * Statistics (Psy 265)
  * Calculus 117 or higher
  * General Physics I and II with lab (PHY 201, 202, 201L and 202L)
• A minimum overall GPA of 3.3 & a minimum prerequisite science GPA of 3.3 at Assumption
• Submission of all application materials by May 16th for entry to the term beginning the next fall

Two students who meet these requirements will be considered for preferred admission. If more than two wish to apply, the College’s Health Sciences Advisor will recommend students who should be considered. Students who do not meet the requirements may still apply to Regis via the standard application process.

The primary contact for this program will be Claudia Pouravelis, Regis College Director, Graduate Admission, Claudia.pouravelis@regiscollege.edu. The agreement will be reviewed bi-annually and may be revised by mutual consent. Termination of this agreement by either party requires no less than one year’s notice. In the event the agreement is terminated, those students who were accepted at Assumption College when the agreement was in effect will be allowed to apply to the NMT program under the terms of the agreement.

We the undersigned, as the academic officers of Regis College and Assumption College, hereby demonstrate our commitment to full implementation of the Agreement.

Dr. Francis Lazarus
Provost, Assumption College
