Articulation Agreement between
Mass Bay Community College Biotechnology
and Regis College Biology and Biochemistry Programs

1. Regis College assures the acceptance of an associate degree graduate from the Biotechnology Program of Mass Bay Community College who has earned a grade point average of 3.0 or better (on a 4.0) scale into the Biochemistry and Biology Programs at Regis College.

2. Students will receive academic credit for all college level courses applied toward the requirements of the associate degree in biotechnology. A maximum of 74 credits will be accepted.

3. Non-credit or remedial courses adjudged to be below college level will not be accepted as credit toward the Regis baccalaureate degree requirement.

4. For the Biochemistry and Biology Majors at Regis College, the student must have successfully completed all requirements for the Biotechnology Major.

5. Students must take, at Regis College, sufficient credits to satisfy the minimum requirements for the Regis baccalaureate degree (120 credits) and/or the minimum requirements for a degree in the biology or biochemistry majors. Three credits in religious studies must be completed at either institution. Regis reserves the right to change these requirements for subsequent academic years.

6. Biochemistry and Biology faculty have organized their courses (see attached sheets) into three- and four semester sequences for information purposes; however, Regis is not obligated to offer all courses specified in the sequence should enrollment be insufficient. Concurrently, if the MBCC graduate is unable to enroll in/complete the Regis courses when offered, the graduate may not be able to complete the sequence as outlined.

7. While enrolled at Regis College, the student may choose to finish in three, four or more semesters.

8. Interested MBCC students should contact the Regis Transfer Counselor, as well as the Regis Faculty Program Chair for the related Regis major as early as possible, but no later than two months before the student's intended date of Mass Bay graduation.

9. This agreement will be revisited at least every two years and may be revised by mutual consent. The agreement may be terminated by either party with not less than one academic semester’s notice.
